

Fetal Alcohol Spectrum Disorders: Understanding Effects, Improving Outcomes

Presented by Teresa Kellerman, Fetal Alcohol Resource Center Coordinator

Workshop for Support Coordinators, Teachers, Counselors, Therapists,
Parents, Early Interventionists, and Providers

Friday, January 21, 2011

9:00 a.m. – 4:00 p.m. (one hour break for lunch)

Division of Developmental Disabilities

Community Resource Center ([map](#))

4710 E. 29th Street, Bldg #10, Tucson

Call Denise to RSVP: (520) 519-1515

- Understand how prenatal exposure affects the brain and impacts behavior
- Recognize physical and neurobehavioral symptoms of Fetal Alcohol Spectrum Disorders
- Identify intervention strategies that help affected individuals of all ages
- Apply new insights to existing program plans to improve outcomes
- Implement protective factors to minimize or prevent secondary disabilities
- Pre-screen for possible FASDs in children and adults
- Learn how to make appropriate referrals for diagnostic evaluations and services

Certificates of attendance will be provided.

Childcare will not be available.

There is no fee for this training, but registration is required.
